

MAKE YOUR OWN KEYRING

INSTRUCTIONS

Scout
Store

What do you need:

1. Ruler 
2. 2 Paracord 6 ft
3. 1 inch ball (plastic, steel or marble)
4. 1 Bead

INSTRUCTIONS

1. Make sure that the 2 ends of the paracord match.

2. Start from the middle and pass the 2 paracords around your fingers. Keep the other half firm with thumb.

3. Go around your 2 fingers with both paracord, fairly tight. Repeat 4 times

4. Make sure to keep the colour combination as in the picture, if using 2 different colour paracords.

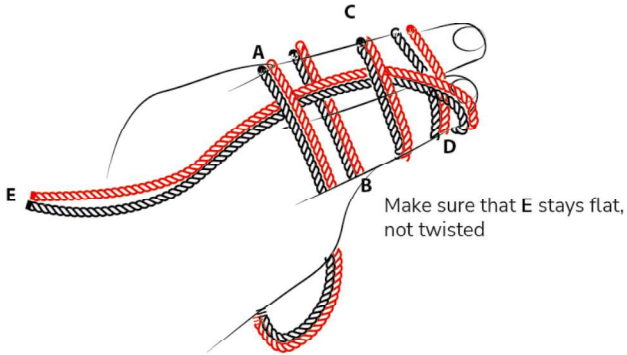

5. Turn your hand on the side and lift every other pair of paracord (A and C)

6. Pass E through A and C

7. E is on top of B and D, through A and C

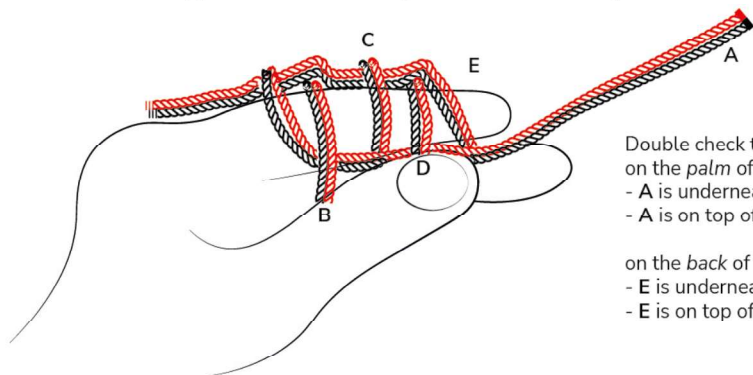

8. Turn your hand.

9. Keep the top of A very tight and pass the end of the 2 paracord (A) through B and D, by lifting them slightly.

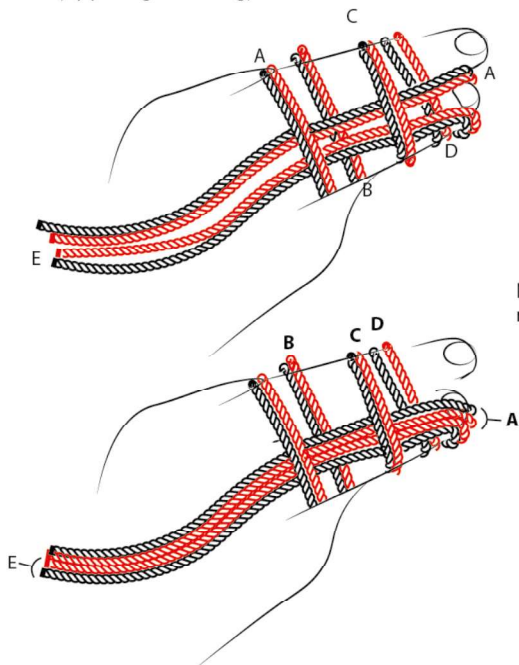

10. Delicately push A and E closer together to create this shape.

Double check that:
 on the *palm* of the hand:
 - A is underneath B and D
 - A is on top of C and E
 on the *back* of the end:
 - E is underneath A and C
 - E is on top of B and D

11. Turn the hand on its back. Pass A through C and A, on top of B and D (by pulling and lifting)

Make sure that A stays flat, not twisted, and that A is next to E

12. Now turn your hand (you are looking at your palm again). Pass E underneath A and C.

13. Turn the hand on its back. Make some space in between A and E.

14. Lift by pulling the little space in between A and E (on D and B) to pass through with E.

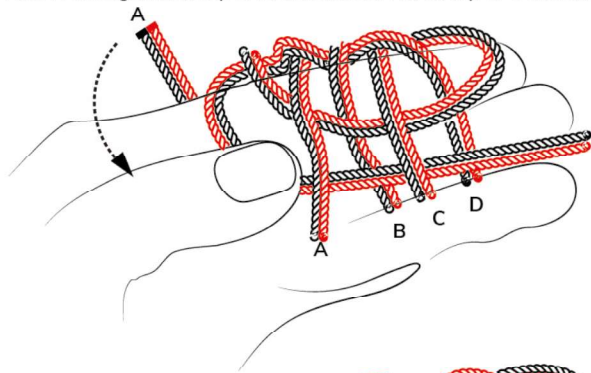

This is the shape you should have now.

Pull it tightly

15. Grab A and turn back to your palm.
 Pass A through Xe, on top of A, underneath Xb, on top of C and underneath Xd.

16. Now you can slowly remove your hand and turn it on its side, so that **A** is on the back and closer to you.

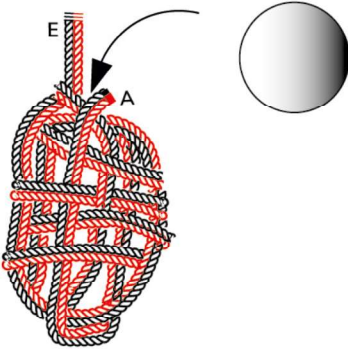

17. Try to make the space **xx** and **yy** even.
Grab **A** and pass it through **xx** and on top of **yy**

Pull A it tightly

18. Turn it around so that you can see the hollow part in the centre.
Place a ball in the middle.

Now it's all about **tightening**, make as many passes as possible.
Be gentle, but firm. Take your time and make it as tight as you can.
It will help you keep the shape.

Knotting proposition

To focus on knotting the globe of the paracord that we've just created is going to be represented as a circle.

A. Make a hoop with 1
Keep it tight with your thumb

B. Go around the hoop with 3
Keep it tight.

C. Go across with 4.
Keep it tight.

D. Pass through the hoop (1) with 2
Pull it tightly.

Almost there.. Few more steps :

E. Reposition the keychain:

Roll it on its side and place 4 underneath 3 (3 is making a hoop)

F. Pass 4 underneath 1-2, through and out 3

G. Pull tight

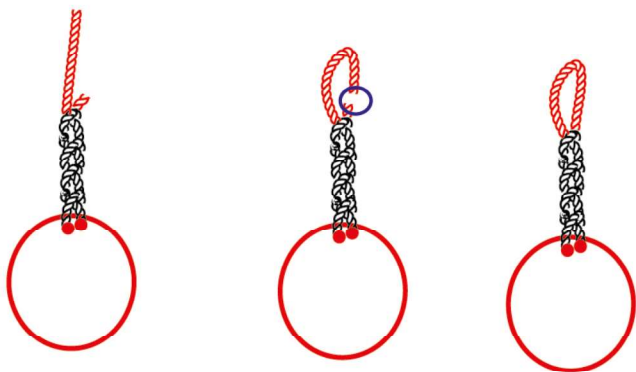

- H. Pass 3 on top of 1-2, creating a hoop on the other side
- I. Pass 4 on top of 3
- J. Pass 4 underneath 1-2, through and out 3
- K. Pull tight

Keep repeating the steps until 4 more times

Turn it upside down

Grab the scissors: cut 1, leaving 3 cm cut all the other extra.

Shape it like a hook, grab the **lighter*** and carefully melt them together.
Start with one end and pull the other one close

*when using the lighter get an adult to help you or do it with adult supervision

Pass a bead through... and you are done!

Congratulations!
You've made your own key ring!
